

Create Professional Resume Using AI ■

[Follow on Instagram: rahulxtech](#)

Step 1

Go to [Claude.ai](#) → Select Claude Sonnet 4.6

Step 2

Upload your old resume PDF and copy the prompt below and paste it into the chat.

Step 3

Copy the generated LaTeX code from Claude.

Step 4

Go to [Overleaf](#) → Create a Blank Project.

Step 5

Replace main.tex with Claude's LaTeX code and click Recompile.

Prompt to Paste in Claude:

You are an expert LaTeX resume designer and ATS resume optimizer.

I will upload my current resume PDF. Your task is to:

1. Analyze the uploaded resume carefully.
2. Create a PROFESSIONAL single-column ATS-friendly LaTeX resume.
3. Generate COMPLETE Overleaf-compatible LaTeX code.
4. Preserve all resume content, but improve formatting, spacing, typography, alignment, and section hierarchy.
5. Make the final resume visually similar to a modern FAANG-style engineering resume.

IMPORTANT DESIGN REQUIREMENTS:

- Use a clean professional layout.
- Resume should look premium and recruiter-friendly.
- Use modern typography and spacing.
- Keep it ATS compatible.
- Use subtle section dividers.
- Align dates on the right side.

- Keep company names bold.
- Keep role names slightly emphasized.
- Skills should be neatly categorized.
- Use compact spacing to maximize information density without looking crowded.
- Use bullet points with strong action verbs.
- Avoid unnecessary colors or graphics.
- The final PDF should look polished and production-ready.

TECHNICAL REQUIREMENTS:

- Use Overleaf-compatible LaTeX.
- Use standard packages only.
- Ensure code compiles without errors.
- Use clean reusable macros/components.
- Keep margins optimized for resume screening.
- Use professional fonts.
- Ensure spacing consistency throughout the document.

SECTIONS TO INCLUDE:

- Header
- Professional Experience
- Skills
- Projects
- Education
- Certifications
- Achievements

OUTPUT FORMAT:

1. First provide the FULL LaTeX code only.
2. Then explain:
 - which packages were used
 - how to compile in Overleaf
 - how to customize sections later

VERY IMPORTANT:

- Do NOT summarize.
- Do NOT shorten experience points.
- Rewrite weak bullet points into stronger achievement-oriented bullet points.
- Improve grammar and professionalism.
- Quantify impact wherever possible.
- Maintain technical accuracy.
- Make the resume look like it was designed by a professional resume writer.

The final result should resemble a premium software engineer / ML engineer resume suitable for:

- Microsoft
- Google
- OpenAI
- NVIDIA
- Amazon
- Meta

Generate the FULL LaTeX code now.
